

Physical Activity, Sitting, and Sleep (PASS) Study for Cancer Survivors

Who is eligible: Individuals diagnosed with cancer, and have completed surgery, chemotherapy and/or radiation treatment within the past 24 months.

What: Examine how your physical activity, time spent sitting, and sleep, and body composition might affect body composition, fitness, fatigue, and quality of life.

You must be willing to:

- Attend a study visit at Colorado State University that consists of physical activity and sleep monitoring, measures of fitness, body composition and quality of life. This visit will last approximately 1.5-2 hours.
- Return the physical activity and sleep devices after 7 days of wear time

Participation includes:

- Individual assessments and reports of physical fitness, body composition, physical activity and sleep habits.
- Monetary compensation up to \$25

If you are interested in participating in this study, please contact:
Mary Hidde, Study Coordinator at patplab@colostate.edu or (970) 491-4653
