

# LL Meeting Notes

## January 28, 2019

Recent (December) USDA inspection:

- No citations for the first time since 2009
- They did have some concerns that were mostly protocol related. The new protocol system will hopefully resolve this by not asking for the same information in multiple places.
- There is a new interpretation of the regulations regarding acquisition of animals from non-registered sources. This applies to livestock and exotics, and places a limit on how many can be purchased for research. This does not apply to horses. Lon is working on getting clarification from USDA about this issue.
- We expect our next inspection to happen in June

KP IACUC:

- See attached power point presentation
- KP IACUC Test User Info will go out later today in a separate email. Elaine will email all Test Users email next Monday when RICRO is ready to accept real protocols for review at the IACUC meeting on 2/26/19.
- Both eProtocol and Kuali don't work well with older versions of Internet Explorer. Recommended browsers are Chrome, Firefox, Safari, Edge and IE 10. Let Elaine know if you experience problems with any of those.

KP Animal Management System (AMS):

- Is in development, with a possible launch of April 2019.
- Test users are needed and Megan will email people based on those who are KP IACUC Test Users.
- Training is planned to begin mid/late February
- No manual data transfer will be required, and there will be no overlap with eAnimal Ordering

Rolling Semi-Annual Inspections will begin in the next few weeks.
